

PFM conversion kits are designed and manufactured in the UK and are used with great success at all levels of racing by many top teams including V&M Racing and Ray Stringer Racing. 1999 racing victories included the TT, NW 200 and Ulster GP.

The patented disc design uses a flat faced 'dog drive', eliminating point contact loading (reducing wear) and the iron rotor offers maximum co-efficient of friction, giving one finger superbike stopping power, whilst also reducing weight and gyroscopic effect on the steering.

All kits are of a modular design with replacement parts readily available.

EACH SUPERBIKE CONVERSION KIT COMPRISES:

- 2 x PFM 320 mm fully floating, narrow pad track, iron discs
- 2 x PFM six piston calipers (for standard mountings and master cylinder)
- 1 x set braided stainless steel hoses
- 2 x sets performance brake pads (choice of road or racing compounds)
